My transportation

MAY EVERYTHING RUN ON WHEELS

The fundamental thing to insure my vehicle or travel safely is to be aware that:

1. Most thefts in vehicles or means of transport are due to the lack of adequate protection systems (alarms or similar means), carelessness and personal imprudence, lack of companionship and a sense of solidarity.

The prevention and self-protection of **MY TRANSPORTATION** requires:

- a. Search and use only transports considered safe and/or accredited as insurance.
- b. Share with your neighbors and colleagues self-protection measures in the case of motor vehicles.
- c. Always keep in mind the information and recommendations of Tecnológico de Monterrey regarding transportation.

Tecnológico de Monterrey carries out programs of:

- Access control, through car stickers or tags, to campus parking lots.
- Private school transportation to campus, Expreso Tec.
- Roadside assistance in campus parking lots.
- Safety recommendations in my car and public transportation.
